

Obsidian Discs Maps & Signs

We create professional course maps and tee signs for courses of our own design or for previously existing courses, all according to customer's requirements. The styling of maps and signs can be worked out in cooperation with our graphic designer.

An eye-catching course map at the start of the course is typically sized at 1050 x 700 mm, but custom sizes are also negotiable.

The map shows clearly the holes and routes between them, disc golf rules and guidelines, and possible special features of the course. The map can also be fitted with names and logos of the constructor or sponsors.

The course map is attached to map frame, that can be easily installed into concrete blocks buried in ground. The map frame consists of a background plate and 60 mm metal poles.

Tee signs are usually of size A4, but we can deliver other sizes, too. Each sign states number of the hole, par rating, and length. The sign has a map describing terrain, obstacles, throw lines, mandos, out of bounds areas etc. There's also space for one or more sponsor's information.

Tee signs are attached to sign frame, that is easy to install into a buried concrete block. The sign frame consists of background plate and 60 mm metal pole.

All metal parts of our map and sign frames are powder coated stainless steel. We deliver the course maps and tee signs printed on weather-proof adhesive fixed on laminated aluminium composite, with or without concrete blocks for secure mounting. We also deliver the maps and signs in digital format, so they can be added e.g. to the course's web or Facebook page.

For orders and quotation requests, please contact us by email info@obsidiandiscs.com, or by phone, +358 50 362 3162 (Ville) or +358 40 093 5893 (Vesa).

Obsidian Discs is a disc golf company located in Joensuu, Finland. Obsidian Discs designs disc golf courses, produces equipment for the courses and manufactures discs. All course maps and tee signs are 100 % handmade in North Karelia, Finland.
